*) in consideration of received or new Grants and Subsidies

Our Focus - Your Target

AIM ADVICE is a logical conclusion of a number of experienced, leading German Mittelstand Managers, whose have been frequently faced with various cross functional challenges on local and international levels, with main focus on Investment, Restructuring and Stabilization Projects.

The live cycle of each company runs by its nature through sequences of ups and downs. While during an successful phase the managers pushing the business into sustainable growth, only a downturn or any other extraordinary strategic challenge can show how sustainable and stable the business really is.

Its fact, that early experts help and advice is of vital importance for overcoming a challenging extraordinary situation with a stronger position afterwards, especially in an international context. **We are there however challenging your situation is.**

Therefore the focus of our activities is on

- Companies in German-speaking countries, with a need for specialized management support and/or international project experience and vise versa on
- international businesses, which may require a German speaking management with international experience for the implementation of local strategic objectives.
